Im-1lucky

I'm a third year Computer Science and Data Science student at G. Pulla Reddy Engineering College with a strong interest in cloud computing, DevOps, and systems engineering. I've built applications using Flutter and Kotlin, including a personal finance tracker and have hands on experience with Arch Linux, scripting, and system configuration.

PROJECTS

Personal Finance Tracker (Kotlin, Jetpack Compose)

- A finance tracking app where transactions are modeled as nodes and loans represented as branches.
- Local data persistence using Room (SQLite), including SMS/notification parsing with weighted keyword scoring to auto detect transactions.
- Implemented PDF export with embedded JSON metadata for portable, structured transaction records.

Arch Linux Custom Desktop Environment

- Built and customized a minimal Arch Linux environment from scratch.
- Configured Linux modules and scripts for Automated system workflows and Linux utilities.
- Optimized system performance and usability through custom configuration files.
- Maintained reproducible configuration using dotfiles and package management tools.
